LaGARD LGBASIC

- **Uses 6 digit combination**
- **Accepts 2 combinations (Master & User)**
- **Four incorrect attempts triggers lockout feature**
- **5 minute lockout period**

We suggest keeping the door in the open position whenever making any program changes to keypad. After making changes, test keypad several times with door in open position before locking

CHANGING COMBINATION

You will hear two beeps between each step performed correctly. If a mistake is made during the process, the lock will continue to work on existing combination.

1. **Enter six (6) zero's**
2. **Enter existing combination**
3. **Enter new combination**
4. **Re-enter new combination for confirmation.**

ADD A USER

1. **Enter manager combination holding down the last digit until the lock signal with two double beeps**
2. **Press 1 - lock will beep twice**
3. **Enter user combination - lock will beep twice**
4. **Re-enter user combination - lock will beep twice to confirm**

DISABLE A USER

1. **Enter manager combination holding down the last digit until the lock signal with two double beeps**
2. **Press 2 - lock signals once**
3. **User is now temporarily disabled**

REINSTATE DISABLED USER

1. Enter manager combination holding down the last digit until the lock signal with two double beeps
2. Press 1 - *lock signals once*
3. User is now reinstated

REMOVE USER

1. Enter manager combination holding down the last digit until the lock signal with two double beeps
2. Press 3 - *lock signals once*
3. **User is permanently removed**
